

My husband composed a letter to Dr. Surpris around Thanksgiving time in 2012. He thought carefully about what he wanted to say and in the sincerest manner he thanked her for all she had done for our family and for being the one who brought his wife back to wellness. He went on to say that she was the one and only doctor who gave his wife a correct diagnosis and placed her on the right regimen of medication.

When I think about all that Dr. Surpris has done for me over the past 16 years, it is hard to find the proper words that convey my gratitude. After being misdiagnosed for over a decade, Dr. Surpris made a promise to me that she would get to the bottom of what was causing me to be so ill for such a long time. With conviction in her voice, she guaranteed me that she would assist me in regaining my mental health. Dr. Surpris not only diagnosed me correctly and placed me on the correct medication, but she also monitored my health carefully and steadily throughout the years. I underwent Transcranial Magnetic Stimulation with Dr. Surpris, and that treatment proved itself to be extremely beneficial to my recovery. It has been almost 16 years since I walked into Dr. Surpris office for the very first time. She continues to monitor me closely and tears up every time I convey to her that I am feeling well, happy, anxiety and at last depression free.
